

Announcement:

Important information regarding your Flexible Spending Accounts

On or after June 1, 2018, FBA is launching a brand new member portal, designed with your employees in mind. The new portal offers simple navigation features, allows account holders to quickly and easily manage their healthcare finances, and provides the tools and resources your employees need to get the most value from their Flexible Spending Accounts.

Why the change?

The new FBA Employee Portal will function exactly the same as the existing site, only it will have a new and exciting look and offer your employees an enhanced online experience. It will be intuitive and easy to use, with the latest responsive design capabilities for optimized use on any device.

How will this impact your employees?

- As of, or shortly after June 1, 2018, the new URL will be fba.wealthcareportal.com
- Employee usernames, passwords, and security questions will not change, and bookmarks will continue to work as a redirect will be in place
- On or after June 1, 2018, your employees simply log in to the FBA Employee Portal using their current login credentials and begin experiencing the new site and all it has to offer

Interested in taking a test drive?

The new portal will go live on or after June 1, 2018. In the meantime, get a sneak peek of the new site at fba.wealthcareportal.com.

We are excited about the enhanced FBA Employee Portal and are confident it will increase the value of our services to you and your employees.
